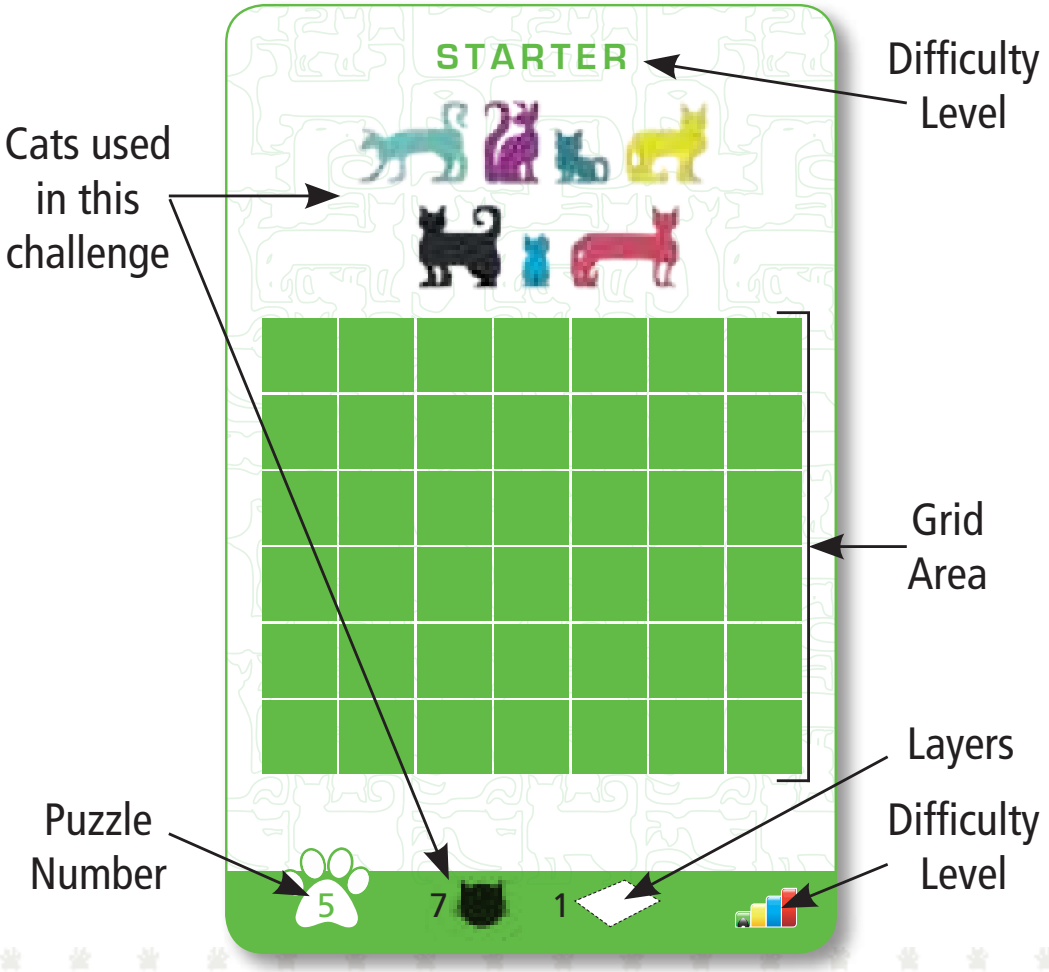
CATSTAX™

OBJECT

Arrange a series of cats on a grid so they perfectly fit the illustrated shape.



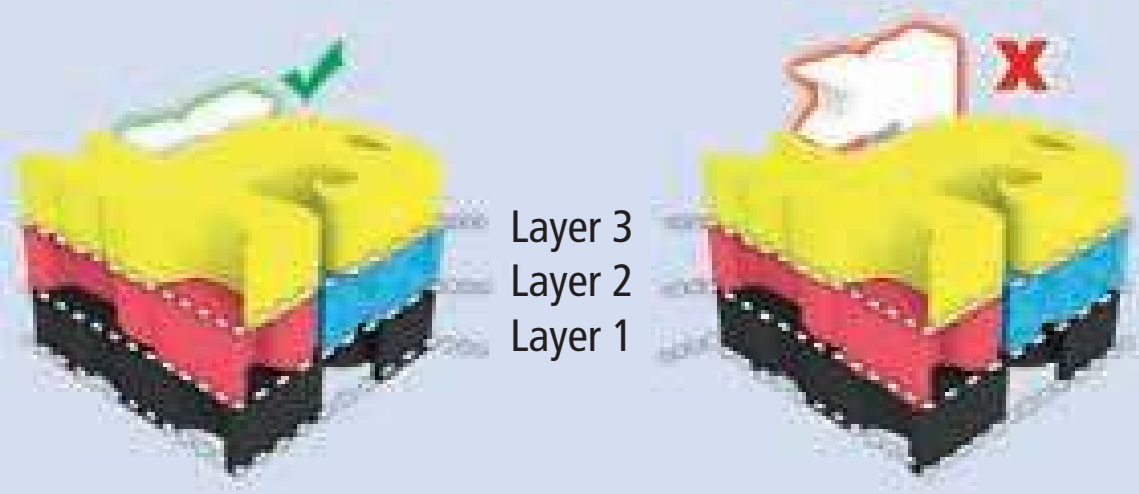
HOW TO PLAY

Choose a challenge card and place it on a flat surface. **Select the cats** indicated at the top of the card and place them onto the gridded area in such a way that they **completely cover** the shape, without any cat part covering an empty space in between or outside the border.

NOTES:

- You must always use **all** of the cats indicated by the challenge card.

- Some challenges indicate multiple "layers", which means that you must stack the cats on top of each other to correctly solve the puzzle. (For example, "3 layers" means that there will be 3 levels of cats stacked on top of each other.) In these layered challenges, all of the cats must fit squarely into the indicated levels, without any parts sticking out.



Correct

Incorrect

- **Hint:** Some challenges require positioning the cats in a combination of standing up, laying sideways, upside down or even in between other cats!

- A single solution is provided for each challenge, but it is possible that there are other valid ways to solve.
